

Product Requirements Document: Office Dashboard

Project: Office Management Dashboard for AdStacks Media

Developer: Anuj Rana

1. Project Overview

Develop a fully responsive office management dashboard using Flutter. The goal is to replicate the provided UI design with modular, scalable code suitable for office use.

2. Technical Architecture

- **Frontend:** Flutter (Web/Mobile/Desktop)
- **State Management:** Provider / Riverpod
- **Charts:** fl_chart package
- **Backend Integration:** 5S / Appwrite API Service Layer

3. UI Components

The interface is broken down into modular components to ensure clean, maintainable code:

- **SidebarWidget:** Navigation & Workspaces.
- **TopBarWidget:** Search, Notifications, Profile.
- **MainContentArea:** HeroBanner, ProjectList, Performance Chart.
- **RightSidebarWidget:** Calendar, Birthday/Anniversary Cards.

4. Responsive Strategy

Implementation of `LayoutBuilder` and `MediaQuery` to facilitate dynamic UI transitions between mobile drawer-based layouts and web multi-column grids.

5. Deployment Plan

After local testing, the application will be built for the web (`flutter build web`) and deployed to Firebase Hosting or Vercel, providing a public live URL for the submission email.
